It's not free speech they want; it's the right to make other folks listen to them when they talk.

Thus has the dance done mere for evening dress than any other influence brought to bear on American citizens. Restaurateurs prohibited in vain, operagoers scowled, and the rule that evening dress must be worn was insisted upon with more or less emphasis. ed upon with more or less emphasis. Apparently it took the despised tango to make Americans enthusiastic about evening dress; so some civilizing influence is not after all to be denied to it.

Having various causes much at heart, they have other uses for their money than displaying it on their backs. The social workers are, very properly, more modest still, spending only \$200. The stenographers, shop girls and factory girls spend, respectively, \$275, \$250 and \$200. As the wages of these girls cannot average above \$15, \$10 and \$8, respectively, it will be seen that they spend too much on their clothes, and yet they could hardly present a decent appearance on less. They lose something by not making their own clothes, but they must be very strong to sew much after finishing their day's work.—Leslie's Weekly.

Barefoot Boy! Horrors!

If it be true, as medical authorities are pointing out, that men are a lot less sensible about their summer dress than women, the boys ought to be reably never will be explained, but the evident fact is that it cannot. This formed early. The question whether one almost lucid sentence culled from a mass of gibberish is one-third true. Wilson and the Rullroads.

Evidently the Wilson administration as called a halt to what it believes be misdirected attacks on the railroads. The President's position seems to be one of moderation, and instead of spurring on the radical trust busters in Congress he has intervened to hold the necessity of calming the fears of business instead of exciting them, and therefore he has resisted every effort radicals to force legislation that will frighten capital from investment.

WHAT CERTIFIED MILK MEANS.

Notwithstanding the humorous gibes at "certified" and "antiseptic" babies perpetrated by paragraphers, the popularity of certified milk grows year by year as parents learn more of its value. Whether or not a father" takes any stock in the germ theory," it is rare ly, indeed, that a father will not gladly go down into his pocket and pay an extra price for certified milk, once an extra price for certified milk, once

an extra price for certified milk, once he has a chance to see how his child thrives on it.

Ordinary market milk is incredibly dirty, especially in the summer months. Milk comes from the udder of healthy cows practically sterile, or free from germs, but each step in its handling under ordinary conditions increases the contamination from dirt, and by the time the milk reaches the consumer it is swarming with germs of all it is swarming with germs of all kinds. For instance, in Washington Market, milk contains an average of 90,000,000 germs per teaspoonful; New York City permits a maximum of about 5,000,000 per teaspoonful; Boston, half that number; Rochester, N. Y., famous as a city of good sanitation, fixes the limit at about 500,000 per teaspoonful—and has a correspondingly low death rate among young children.
